Cécile Geiger creates unique sculptures for unique spaces. Each individual art work is handmade in her workshop in rural Burgundy, France. She folds, cuts and welds the steel, transforming sheets of metal into abstract forms that reflect at once the strength and the fragility of the nature that surrounds her. Inspired by entwined vegetation and rock strata, her work plays with the idea of natural balance and harmony in asymmetric organic shapes. The added light source highlights the interior spaces while projecting shadows from the empty spaces onto surrounding surfaces. Designed to inhabit a space, the bespoke sculptures integrate or respond to a individual settings.
